

SAFETY & PROTECTION

FOR YOUR BUSINESS & YOUR FAMILY

Inspection, Service & Installation of Fire,
Life Safety & Security Systems

COMPLETE FIRE ALARM SERVICES

Choosing a commercial fire alarm system isn't something to take lightly. Not only are you selecting a system to protect lives and property, but you're also selecting a partner that is going to stand by you throughout the installation, testing, service and occupancy process.

At the heart of your system our fire alarm control panels offer powerful features you would expect from our trusted security provider.

INTEGRATED SECURITY SERVICES FOR COMPLETE LIFE SAFETY

In addition to fire protection, we offer comprehensive security coverage for your business — integrated for one-stop total control.

KEY ADVANTAGES

- Up to 564 addressable wired fire zones or up to 500 two-way commercial fire-rated wireless zones
- Zone Programming - Adds flexibility to match individual zone characteristics to the needs of any area in the fire installation
- AT&T® LTE, Verizon® LTE, AT&T® FirstNet®, Wi-Fi or 10/100 Base-T network, or two-line dialer communication options
- Eight paths of communication to central monitoring station for maximum redundancy and flexibility
- Interconnected access control and fire trigger doors to release allowing free egress when an alarm event occurs
- Up to 67 Amp hours of standby batteries supported
- Manufactured in U.S.A. with U.S. and global components

DESIGN, INSTALLATION AND INSPECTION OF FIRE ALARM AND DETECTION SYSTEMS

To eliminate any point of failure between fire alarm signals and the monitoring center, all panel communication is transmitted from the protected premise directly to the monitoring center receiver. Other fire systems first send alarm data to a clearinghouse where it's then interpreted and retransmitted to a monitoring center receiver over the internet.

In addition, the state-of-the-art communicator is built right onboard. This eliminates delays in communicating critical alarm events. When lives are on the line, the fastest alarm communication can save critical moments and untold property.

XR Series Fire Panels come standard with the traditional two-line dialers used for decades. More importantly they also come standard with a network communication onboard that can send alarm signals to the monitoring center in a fraction of a second. You can also add cellular backup or cellular primary communication from AT&T or Verizon for fast reliable LTE communication from even the most remote areas. Network or cell communication options typically save you money every month, over the cost of having two POTS phone lines installed.

Most importantly, all our components, including alarms, smoke and carbon monoxide detectors and fire suppression are integrated into one system for greater reliability and convenience.

Every building is different, and a fire detection and suppression system is not a one-size-fits-all option. Whether you have a new-build project or need to update a legacy system, we can design a system custom tailored just for you.

FIRE | LIFE SAFETY | SECURITY

KEEP YOUR BUSINESS AND FAMILY SAFE FROM FIRE, LIFE SAFETY, AND SECURITY RISKS.

Since 1946, Pye-Barker Fire & Safety has been an industry leader with a reputation for putting our customers first. That's why businesses large and small trust us, and why the most well-regarded brands in the industry have joined our family.

24/7 PROTECTION

Our trained professionals provide around-the-clock monitoring of your security and alarm system — ready to respond at a moment's notice. There's no waiting on hold or going through a tedious process to get help. As a local company, you get access to courteous, friendly customer service reps and technicians, and you benefit from our personal connections with first responders.

YOUR SECURITY PROFESSIONALS

We let you focus on your business while we focus on keeping it safe and secure. You get fire control that is completely integrated with your professionally monitored security system for total control. Your system will be totally customized, sized and configured to meet your needs and budget. Expert technicians install the best products on the market and stand ready to respond quickly to any needs you may have.

EXCEEDING INDUSTRY STANDARDS

Made, tested, and quality inspected in the U.S., our products meet the highest standards in the security industry:

LISTINGS AND APPROVALS
